

We help people constrained by technology.

Trust and integrity are the foundation of our relationships with clients.

Our goal as a company is to accelerate your business through technology. We partner with you by focusing on your business goals and emphasizing superior customer service. For over 25 years, our technicians have been creating customized IT solutions based on our customers' specific business needs. We help people like you with your technology so that you can focus on what you do best - running your business.

What We Do: Managed IT Services

Strategic Consulting

Professional Services

24/7 IT Support

No long-term contracts. See how we can earn your trust.

One of the biggest impacts that ABS has on us is their ability to allow us to do what we do as a business and not have to worry about our technology. What we want to do as a business is serve our customers and we can't do that if we're messing around with our server.

Annette Manias, President, *Oasis Solutions*

ABS has always had great people, experts, that have ensured that we won't have to be the expert. They've been great to lean on with "what if" scenarios with "we have to do this" scenarios - all kinds of different things that we've taken to them and they've been able to help us navigate those technology challenges.

Katie Blakeley, CEO, *PetFirst Healthcare*

Region's Largest Managed IT and Cybersecurity Provider

ABS Services

Managed Services

Our goal as a Managed Services Provider (MSP) is to focus on your technology, so you can focus on your business. This means providing day-to-day support and looking into the future of your business and anticipating the IT solutions you'll need to reach your business goals.

The best way we can describe our Managed Services is: Proactive. We proactively plan for your future technological needs and address current technological needs to eliminate unnecessary downtime and help your business grow – day in, day out and year after year.

Other Services

Included as a part of our Managed Services or individually as one-off solutions:

Network Design

We can assess your current applications & software requirements to ensure the most cost-effective & efficient IT strategies.

Virtualization

Consolidate your existing servers & desktops while still operating all applications & expanding their life cycles by 4-5 years.

Outsourcing

We'll provide a fully managed team of professional & highly skilled technicians who can take your projects and initiatives from start to finish.

Disaster Recovery

We can create a business continuity plan to address any & all potential disasters that may affect your business.

Cloud Strategy

Get a comprehensive strategy as you move towards or rely more on Cloud services like Office 365, Microsoft, Azure, & more. We'll help you benefit the most from your Cloud service of choice.

Strategic Planning

Our Technical Account Managers will come alongside you to create a 5-year IT roadmap & execute the technological steps needed for you to achieve your business goals.

Help Desk

We understand how frustrating technology issues can be & we are here to help with 24/7 capabilities & live answers!

Professional Services

Highly skilled technicians will oversee & execute projects based on your business goals. These projects are planned based on your 5 year IT roadmap and budgeted well in advance to ensure ultimate success.

Cybersecurity

Identify the various security layers your company needs in order to secure vulnerabilities & protect it from attack.

Data Analytics

Helping you unlock data you already have to empower your business decisions through reporting & dashboarding.

We Help People. That Is the Key Component of What We Do.
