Aktion Cloud Services
For Infor Users

CLOUD & MANAGED SERVICES

A Cloud Solution Built Specifically for Infor Users

Ready for a business that's always on?

Where your Infor software is available, supported and maintained? Where data is accessible, accurate and secure? Where employees are efficient and communication between teams is seamless? Ready for a business where downtime and lost profits are a thing of the past?

An always-on business is the reality with Aktion's Cloud Services.

The Aktion Difference

Hosting providers are not equal. Delivering generic services is not good enough. Aktion has been installing and supporting Infor applications for more than 25 years. We know the Distribution industry. We are technology infrastructure experts.

Aktion owns and maintains two secure, fully-redundant data centers, which means we have the capacity and the expertise to spec servers out exactly as needed to optimize hosted applications.

Cloud hosting customers always purchase exactly the right amount of RAM, CPU, and storage that they require– with the option of increasing (or reducing) these, as needed, in precise increments

Infor Cloud Services include:

- Support of RDP for Windows 7, Windows 8.1, Windows 10 computers, and macOS
- Easy end-user experience using published applications
- Windows OS and Office updates, patches and fixes
- Printing support on networked printers with PCL 5 or better
- Geo-redundant backup and disaster recovery
- Encrypted data
- 24/7 performance monitoring with unlimited on-call technical support
- Optional Managed Services and Infor software consulting
- High availability environment with mobile Internet access

Applications Aktion hosts:

Infor Software	Third Party
•Infor A+ • Infor CloudSuite Distribution • Infor CRM • Infor FACTS • Infor StoreFront • Infor SX.e	• Avalara • Insite Commerce • MITS/iReporting • StarShip • UnForm Document Management & Image Manager
