

# SmartFoodSafe

— Digitalize Food Safety —

A Smart Investment in Technology for Safer Food  
Quality, Food Safety, Regulatory & Traceability  
Management Software Solutions

# About Us

## VISION

We leverage technology to tackle global food supply chain challenges, combining functional expertise with our all-encompassing farm-to-fork software solutions.

## MISSION

Our mission is to deliver tech-enabled, cost-effective software solutions that ensure quality, food safety, and regulatory compliance in a smarter way.

## HISTORY

Our journey began in 2017 in Montreal, aiming to develop smart software solutions to address the evolving compliance needs of consumers.

## FARM TO FORK SOFTWARE SOLUTIONS

Comprehensive software solutions ensuring quality and safety across the supply chain

## AUDIT READY, ANYTIME, ANY DAY

Stay Audit Ready with global food safety and quality program compliance requirements

## POSITIVE RETURN ON THE INVESTMENT

Cutting costs without compromising on the quality or food safety with technology

## BUILT-IN SMART TECHNOLOGIES

Integrating the latest technologies makes business processes smarter and more efficient

## We Make Food Safety Smarter and Affordable

*In today's tech-driven world, there's a smart way to do everything, so why not with Quality & Food Safety program management?*

*Smart Food Safe delivers software solutions that tackle various challenges in the food industry, bridging the functional knowledge gap with advanced technologies..*

## Our Software Modules

Our comprehensive suite of 18+ software modules designed to revolutionize the management of Quality and Food safety programs. By adopting a modular approach, each module can be tailored to address specific challenges within the food industry, providing a customized and scalable solution for businesses of all sizes. This flexibility, combined with the latest technological integrations, ensures that Smart Food Safe not only meets but exceeds regulatory requirements and industry standards, delivering a significant competitive advantage. With our innovative software, companies can streamline their operations, enhance compliance, and ensure the highest levels of Food safety and Quality, all while improving efficiency and reducing costs.

### SMART RECORD

Transition from paper-based traditional methods to digital record management, ensuring compliance, traceability, and efficiency while minimizing paper waste and errors.

### SMART DOCS

Enhance document management with Smart Doc's strong document control, ensuring adherence to regulations and promoting seamless collaboration

### SMART CAPA

Effectively handle complaints, holds, and deviations using Smart CAPA, facilitating root cause analysis and executing corrective and preventive action plans

### SMART SPECIFICATION

Efficiently manage creation, revision, and distribution of material specifications to ensure efficiency, accuracy, compliance, and effective communication throughout supply chain

### SMART AUDIT

Automate audit management by replacing traditional checklists with Smart Audit, effectively managing and tracking audits to ensure compliance in food safety and quality.

### SMART EMP

Enhance environmental monitoring with Smart EMP's automated mapping, scheduling, and predefined corrective actions, ensuring a safe and hygienic environment.

## SMART TRAINING

Enable effective and comprehensive training programs by tracking progress, certifications, and enhancing skills to optimize organizational learning initiatives efficiently.

## SMART LABEL

Recipe and nutritional labeling software to simplify recipe management, accurate label creation and ensuring compliance with the regulatory requirements.

## SMART SUPPLIER

Smart Supplier streamlines supplier evaluation and approval processes, ensuring compliance with organizational standards and enhancing supply chain reliability and efficiency

## SMART REPORTING

Empower business decisions through customized report creation, advanced data visualization, and analytics, enhancing decision-making and operational efficiency.

## SMART VISITOR

Optimize check-in procedures, enhance security measures, and monitor visitor and contractor activities to ensure enhanced facility safety and compliance with Smart Visitor

## SMART RECALL

Manage supply chain risks by automating recall events with efficient planning, execution, and communication, ensuring a swift response to mitigate risks and uphold consumer safety

## SMART COMPLIANCE

Streamline the product release process by automating analysis result reviews and COA verifications against product specifications using Smart Compliance.

## SMART HACCP

Ensure food safety through systematic hazard analysis, critical control point determination, monitoring, and compliance with regulatory standards and requirements

## SMART LAB

Laboratory Information Management Software (LIMS) to streamline sample tracking, data management, and reporting, ensuring efficiency, compliance, and accuracy in laboratory operations.

## SMART IAM

Identity and Access Management to ensure secure and efficient management of user identities, permissions, and access across organizational systems and applications

## SMART FARM

Transform crop production operations using Smart Farm to achieve real-time traceability and demonstrate compliance with Good Agricultural Practices (GAP) requirements.

## SMART REGULATORY

Navigate global food import and export requirements, enhance regulatory visibility, reduce compliance workload, and effectively adapt to regulatory changes

## SMART INTEGRATION

Seamless integration of intra-modular data, external Application Programming Interface (APIs), and Internet of Things (IoT) facilitates efficient data interaction across software platforms

## SMART OOS

Systematic management of deviations, investigations, root cause analysis, and corrective and preventive actions to ensure product quality and regulatory compliance.

## SMART TRACEABILITY

Maintain traceability and compliance by tracking products and processes real time across supply chains with robust capabilities for data capture, analysis, and reporting.

## WASTE MANAGEMENT

Tracks waste generation, disposal, recycling, and regulatory compliance, promoting resource efficiency and environmental sustainability across diverse industrial and commercial sectors

## CHANGE MANAGEMENT

Systematic planning, implementation, tracking, and communication of organizational changes ensure smooth transitions and operational continuity across the organization.

## PREVENTIVE MAINTENANCE

Schedule, track, and execute maintenance tasks to optimize equipment reliability and operational efficiency, minimizing downtime and enhancing productivity and cost-effectiveness.

## Solutions We Offer

Supplier Risk Management

Food Safety Compliance

Environmental Monitoring Program

Quality Program Management

Our software provides versatile solutions across various industries, leveraging advanced technologies to efficiently manage Quality & Food safety

Specification & Nutritional Labeling

Audit & Gap Assessment

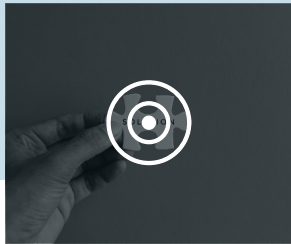

Training & Development

CAPA Process Management

# Why SmartFoodSafe

Smart Food Safe offers cutting-edge software solutions that revolutionize Food safety management, ensuring Quality compliance with stringent Regulations effortlessly. Our technology bridges the gap between traditional practices and modern needs, providing comprehensive, efficient, and user-friendly tools for the food industry. With a focus on innovation and compliance, Smart Food Safe empowers businesses to enhance safety standards while optimizing operational efficiency.

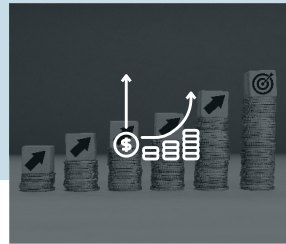

## One Stop Solution

Comprehensive,  
Integrated Software Suite

## Modular Approach

Flexible, Scalable  
Software Modules

## Affordable

Cost-effective, Pay for  
Only What you Need

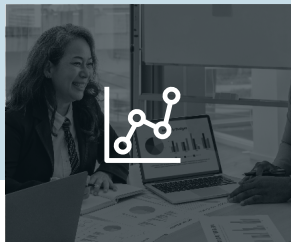

## User Interface

Intuitive Design for  
Simple User Experience

## Technology Integration

Seamless Integration  
with Technology

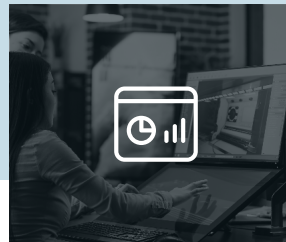

## Custom Reporting

Tailored reports for  
informed decision-making

## Data Security

Robust protocols ensuring  
Data Integrity

## Configurable

Adaptable and  
customizable platform

## Customer Support

Dedicated Customer  
Support round the clock

## Cross Platform

Compatibility across  
multiple platforms
