

FUN TO WEAR AND EASY TO DISPENSE!
OPTICIAN, KID, AND PARENT APPROVED!

DB4K
REACT

REACT

DB4K React is made from strong yet flexible BPA-free and latex-free Pebax® Rnew®. This material is made from castor beans that absorb atmospheric CO2 while they grow, making DB4K React an eco-friendly, sustainable option parents can feel good about.

- Hypoallergenic, bio-based material is extremely strong, flexible, and lightweight
- Can be heated for lens insertion and adjustments
- Easily adjustable temple
- Fused crinkle hinge engineered for durability
- Temples hug the head to keep glasses in place during play and sport
- Color-coordinated removable strap secures frames
- Carabiner for easy attachment to backpacks
- Replacement straps can be ordered

THE FLEXIBLE KIDS EYEWEAR
THAT IS OPTICIAN AND
ECO-FRIENDLY!

Name and Color of Frame

An eco-friendly display box and coordinating mat is available with a 15-piece order.

The debut React collection features 9 styles, including an upcoming baby model, in a fun range of translucent and two-tone colorways.

DB4K React is a line you can feel good about carrying. Pebax® Rnew® is made from castor beans, which require little irrigation and do not contribute to deforestation. Our Pebax® material is an easy-to-grow cash crop for independent family farms in the Gujarat region of India. Pebax® supports these farmers with educational programs that promote sustainable farming that have led to a 30% reduction in their water use. These programs have already helped over 6,000 farms across 80 villages earn a living wage while caring for our environment.
