

Built by Wetland Professionals, for Wetland Professionals

BioApp is a **custom-built data collection application** designed to streamline the **U.S. Army Corps of Engineers Wetland Determination Forms**. Simply enter your data into the app and it will do the tedious work for you!

- ✓ Auto-populates geographical information (City/County, PLSS, Soil Map Unit, NWI, etc.) using device location or coordinates
- ✓ Works offline
- ✓ Plant species dropdowns for either latin or common names, with indicator statuses for all Corps regions
- ✓ Integrated photo collection
- ✓ Automatic, instant calculations (Rapid Test, Dominance Test, Prevalence Index, etc.)
- ✓ Built-in references and descriptions for soil and hydrology indicators for all regions
- ✓ Outputs directly to an editable PDF form with the click of a button for fast and easy QAQC and editing
- ✓ Competitive, transparent pricing with monthly or bi-annual subscription options

Developed for both **Apple** and **Android** products, data can be collected with any mobile device.
