

Introducing our FLAME RESISTANT WINDSHIELD VEST

The Most Versatile Layering Workwear Piece

LAPCO FR™

Constructed with an innovative performance fabric, Lapco's new FR Windshield Vest is a go-to for Mother Nature's seasonal unpredictability.

A winner in weather all year round.

WATER REPEL

- DWR finish on the outershell repels water by chemical based barrier
- PU laminated film to stop water from penetrating the outershell

WIND BLOCK

- The PU film works as a wind barrier preventing cold wind from entering the outershell

WICKING

- The next-to-skin fabric is smooth, flame resistant cotton with moisture management technology
- The PU film has sufficient air permeability allowing water vapor to escape

WARMTH

- Prevents body heat from escaping, creating a loft, and trapping air to increase insulation

Comfortable fleece lining for warmth

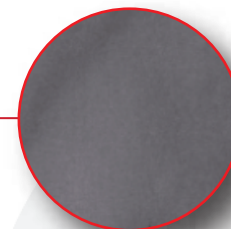

Zippered chest pocket for secured storage

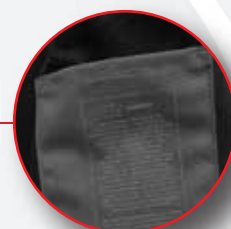

Large hand-warmer pockets

Interior fabric loop for hanging garment

Durable FR duck fabric with weather protection performance

Interior patch pocket for additional storage option
