

PureOHS™

Intuitive software that streamlines
employee medical recordkeeping
and compliance activities.

More options.
More opportunities.

PureOHS™ helps make employee medical compliance, surveillance and incident management more efficient. Whether you are a manufacturer, a healthcare facility, a municipality or any other organization struggling to track your compliance with OSHA, CDC or internal regulations, PureOHS™ can help.

UL Solutions

PureOHS™ integrates with SYSTOC®, our healthcare practice management system designed to help create a health and safety culture to generate employee satisfaction and organizational success. Our team of experts is here to help you get the most out of your system and answer any questions you may have along the way.

PureOHS™ key features

Incident management

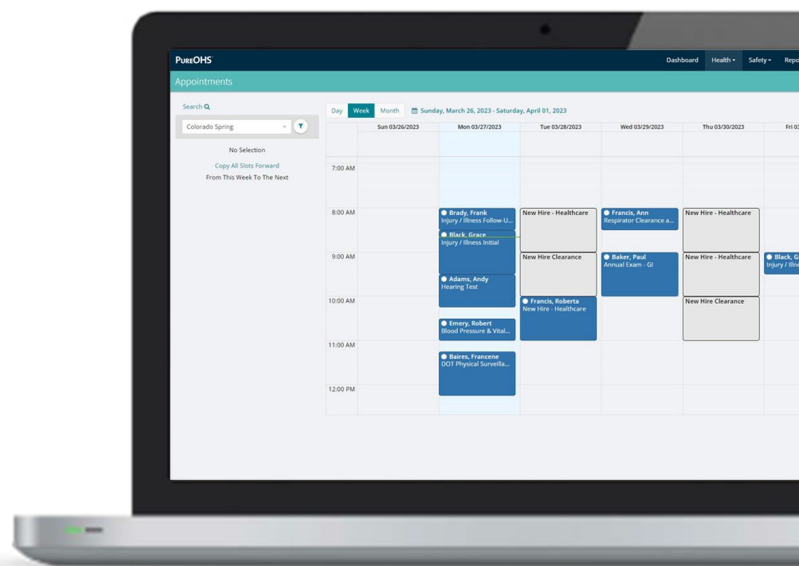

Record, manage and report incidents, near misses and other conditions that could lead to injury or illness. Automatically notify supervisors and safety personnel when incidents occur. Easily export required forms ready to upload to OSHA and identify key areas for safety improvement.

Onboarding new employees

PureOHS™ provides human resources and onboarding specialists the ability to schedule pre-placement physicals based on clinic availability. Dashboards allow HR to follow the clearance process for new employees.

Appointment scheduling

Schedule clinic visits and send email notifications and reminders. Send out electronic forms that can be completed online before the appointment. Manage your clinic more efficiently with multiple views, sorting by day, week or medical staff.

Case management

Companies can manage injured employees back to work safely and efficiently while streamlining communication for all involved.

Reporting

- Visually appealing dashboards
- At-a-glance reports

Encounter management

Comprehensive documentation for various encounter types such as annual and onboarding physicals, injuries, vaccinations, audio screenings, Department of Transportation (DOT) exams, pulmonary function tests (PFTs), mask fit testing and more.

Employee and supervisor portals

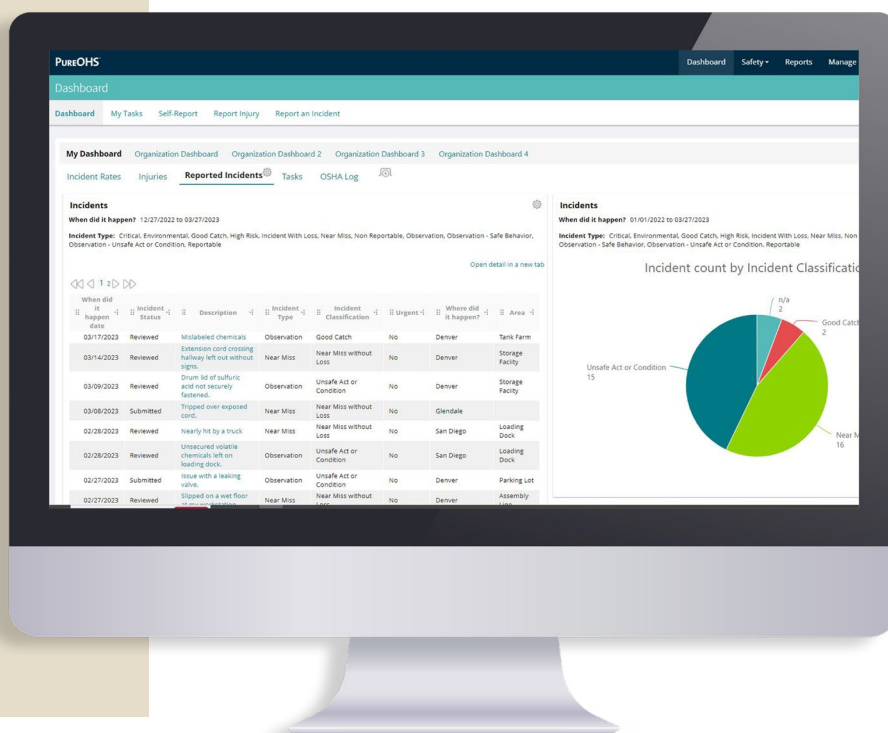

Supervisors, directors and executives can easily see compliance rates, modified work duties, and tasks for their direct reports. Employees can upload documentation such as proof of vaccinations that automatically feed into a streamlined review process. They can also view and print medical charts such as immunization history too.

Vaccination event management

Eliminate paperwork associated with largescale vaccinations or exposures. PureOHS™ can replicate nearly any paper form and be signed electronically.

Medical surveillance and compliance programs

Automatically track which employees are due for medical testing, vaccinations and other requirements. PureOHS™ programs are flexible enough to handle nearly any protocol with standard configuration tools. Quickly understand which employees are in and out of compliance and take action to fill the gaps, including notifications to employees and their supervisors.

Our guidance. Your peace of mind.

We create tools to help your employees provide the best possible care. PureOHS™ enables you to manage regulatory needs, including OSHA and CDC reporting, securely and efficiently.

Mobile and secure

Mobile and secure accessible anywhere with an internet connection, PureOHS™ is designed to work on most devices.

Adaptability

Our software is flexible enough to accommodate the many changes that happen in the world of employee health and safety. Whether management updates the consent forms or a new protocol is added by the government, PureOHS™ adjusts so you can maintain compliance with minimal impact on workflow.

Tailored implementation

PureOHS™ is software as a service (SaaS) and does not require involvement from IT staff to install or update. However, our experts are happy to tailor implementation to meet your unique needs. Additionally, PureOHS™ accepts data from any human resource management system and uploads employee information automatically.

SYSTOC® integration

Enjoy the mobility of PureOHS™ with the powerful billing and reporting functions of SYSTOC® immunization information entered into PureOHS™ will flow seamlessly back to SYSTOC®, allowing CDC reporting to be completed with either system.
