

Who Decides the Future of Connected Vehicles?

Connected Vehicle Systems Alliance (COVESA), formerly known as the GENIVI Alliance, was formed with one goal in mind: to develop open standards and technologies that accelerate innovation for connected vehicles, creating a more diverse, sustainable and integrated mobility ecosystem.

COVESA Ecosystem Benefits

OPEN & GLOBAL

Global professionals developing open standards for connected vehicles.

MEMBER-CENTRIC

Strong and active member base working to shape the future of connected vehicles.

VIBRANT ECOSYSTEM

Bringing buyers and sellers together, supporting the adoption of alliance results.

PROJECT CONTAINER

Bring your challenges and projects to COVESA and leverage members' expertise to create joint platforms.

Engagements

Common Vehicle Interface Initiative (CVII)

Aligning the industry around standards for vehicle data (Vehicle Signal Specification), services (Vehicle Service Catalog) and cloud connectivity in collaboration with W3C, Open Insurance, eSync Alliance and other organizations.

Android™ Automotive Special Interest Group (SIG)

Focusing on software integration and supporting automakers and their suppliers adopting Android Automotive.

In-vehicle Payment/EV Charging Special Interest Group (SIG)

Exploring standard approaches for in-vehicle commerce, EV charging and payments.

Automotive Cybersecurity Team

Addressing a growing number of standards and topics enhancing cybersecurity in the vehicle.

Join the member-driven organization that is defining the future of connected vehicle systems and mobility. Learn more at www.covesa.global/join

Information about technical participation in COVESA projects can be found on the COVESA Wiki. If you are interested in joining the COVESA marketing team, please email marketing@covesa.global
