About this segment

Parks and Rec

This is the
#1
dominant segment
for this area

In this area
13.3%
of households fall
into this segment

In the United States
2.0%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

Practical Parks and Rec suburbanites have achieved the dream of home ownership. They have purchased homes that are within their means. Their homes are older, and townhomes and duplexes are not uncommon. Many of these families are two-income married couples approaching retirement age; they are comfortable in their jobs and their homes, budget wisely, but do not plan on retiring anytime soon or moving. Neighborhoods are well established, as are the amenities and programs that supported their now independent children through school and college. The appeal of these kid-friendly neighborhoods is now attracting a new generation of young couples.

Our Neighborhood

- Homes are primarily owner-occupied, single-family residences built prior to 1970; townhomes and duplexes are scattered through the neighborhoods.
- Both median home value and average rent are close to the national level.
- Households by type mirror the U.S. distribution; married couples, more without children, dominate. Average household size is slightly lower at 2.49, but this market is also a bit older.

Socioeconomic Traits

- More than half of the population is college educated.
- Older residents draw Social Security and retirement income.
- The work force is diverse: professionals in health care, retail trade and education, or skilled workers in manufacturing and construction.
- This is a financially shrewd market; consumers are careful to research their big-ticket purchases.
- When planning trips, they search for discounted airline fares and hotels and choose to vacation within the U.S.
- These practical residents tend to use their cell phones for calls and texting only.

Market Profile

- Cost and practicality come first when purchasing a vehicle; Parks and Rec residents are more likely to buy domestic SUVs or trucks over compact or subcompact vehicles.
- Budget-conscious consumers stock up on staples at warehouse clubs.
- Pass time at home watching documentaries on Animal Planet, Discovery or History channels. For an outing, they choose to dine out at family-style restaurants and attend movies. Between trips to the casinos, they gamble on lottery tickets and practice their blackjack and poker skills online.
- Convenience is important in the kitchen; they regularly use frozen or packaged main course meals. Ground coffee is preferred over coffee beans.
- Residents here take advantage of local parks and recreational activities. Their exercise routine is a balance of home-based exercise; a session at their local community gym; or a quick jog, swim or run.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2017. Update Frequency: Annually.

About this segment

In Style

This is the
#2
dominant segment
for this area

In this area
10.1%
of households fall
into this segment

In the United States
2.2%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

In Style denizens embrace an urbane lifestyle that includes support of the arts, travel and extensive reading. They are connected and make full use of the advantages of mobile devices. Professional couples or single households without children, they have the time to focus on their homes and their interests. The population is slightly older and already planning for their retirement.

Our Neighborhood

- City dwellers of large metropolitan areas.
- Married couples, primarily with no children or single households; average household size at 2.33.
- Home ownership average at 69%; more than half, 51%, mortgaged.
- Primarily single-family homes, in older neighborhoods (built before 1980), with a mix of town homes and smaller (5-19 units) apartment buildings.
- Median home value at \$213,500.
- Vacant housing units at 8.8%.

Socioeconomic Traits

- College educated: 46% are graduates, 75% with some college education.
- Low unemployment is at 5.6%; higher labor force participation rate is at 68% with proportionately more two-worker households.
- Median household income of \$65,600 reveals an affluent market with income supplemented by investments and a substantial net worth.
- Connected and knowledgeable, they carry smartphones and use many of the features.
- Attentive to price, they use coupons, especially mobile coupons.

Market Profile

- Partial to late model SUVs or trucks.
- Homes integral part of their style; invest in home remodeling/maintenance, DIY or contractors; housekeeping hired.
- Prefer organic foods, including growing their own vegetables.
- Financially active, from a variety of investments to home equity lines of credit.
- Meticulous planners, both well insured and well invested in retirement savings.
- Generous with support of various charities and causes.
- Actively support the arts, theater, concerts and museums.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. About this segment

Old and Newcomers

This is the
#3
dominant segment
for this area

In this area
8.4%
of households fall
into this segment

In the United States
2.3%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

The Old and Newcomers market features singles' lifestyles, on a budget. The focus is more on convenience than consumerism, economy over acquisition. Old and Newcomers is composed of neighborhoods in transition, populated by renters who are just beginning their careers or retiring. Some are still in college; some are taking adult education classes. They support environmental causes and Starbucks. Age is not always obvious from their choices.

Our Neighborhood

- Metropolitan city dwellers.
- Predominantly single households, with a mix of married couples (no children); average household size lower at 2.11.
- 54% renter occupied; average rent, \$800.
- 45% of housing units are single-family dwellings; 44% are multi-unit buildings in older neighborhoods, built before 1980.
- Average vacancy rate at 11%.

Socioeconomic Traits

- Unemployment is lower at 7.8%, with an average labor force participation rate of 62.6%, despite the increasing number of retired workers.
- 30% of households are currently receiving Social Security.
- 28% have a college degree, 33% have some college education, 10% are still enrolled in college.
- Consumers are price aware and coupon clippers, but open to impulse buys.
- They are attentive to environmental concerns.
- They are more comfortable with the latest technology than buying a car.

Market Profile

- Residents are strong supporters of environmental organizations.
- They prefer cell phones to landlines.
- Entertainment features the Internet (dating sites and games), movies at home, country music and newspapers.
- Vehicles are basically just a means of transportation.
- Food features convenience, frozen and fast food.
- They do banking as likely in person as online.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2017. Update Frequency: Annually.

About this segment

Set to Impress

This is the
#4
dominant segment
for this area

In this area
7.6%
of households fall
into this segment

In the United States
1.4%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

Set to Impress is depicted by medium to large multi-unit apartments with lower than average rents. These apartments are often nestled into neighborhoods with other businesses or single-family housing. Nearly one in three residents is 20 to 34 years old, and more than half of the homes are non-family households. Although many residents live alone, they preserve close connections with their family. Income levels are low; many work in food service while they are attending college. This group is always looking for a deal. They are very conscious of their image and seek to bolster their status with the latest fashion. Set to Impress residents are tapped into popular music and the local music scene.

Our Neighborhood

- Residents are better educated and mobile.
- Unemployment is higher, although many are still enrolled in college.
- They always have an eye out for a sale and will stock up when the price is right.
- They prefer name brands, but will buy generic when it is a better deal.
- Quick meals on the run are a reality of life.
- They're image-conscious consumers who dress to impress and often make impulse buys.
- They maintain close relationships with family.

Socioeconomic Traits

- Apartment complexes represented by multiple multi-unit structures are often nestled in neighborhoods with single-family homes or businesses.
- Renters make up nearly three quarters of all households.
- They're found mostly in urban areas, but also in suburbs.
- Single-person households make up over 40% of all households.
- It is easy enough to walk or bike to work for many residents.

Market Profile

- They listen to a variety of the latest music and download music online.
- Majority have cell phones only, no landlines.
- They use the Internet for social media and managing finances.
- They own used, imported vehicles.
- They shop at Walgreens.
- They enjoy leisure activities including going to rock concerts, night clubs and the zoo.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2017. About this segment

College Towns

This is the
#5
dominant segment
for this area

In this area
5.8%
of households fall
into this segment

In the United States
1.0%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

About half the residents of College Towns are enrolled in college, while the rest work for a college or the services that support it. Students have busy schedules, but make time between studying and part-time jobs for socializing and sports. Students that are new to managing their own finances tend to make impulse buys and splurge on the latest fashions. This digitally engaged group uses computers and cell phones for all aspects of life including shopping, school work, news, social media and entertainment. College Towns are all about new experiences, and residents seek out variety and adventure in their lives.

Our Neighborhood

- These are non-family households with many students living alone or with roommates for the first time.
- This segment is a mix of densely developed student housing and dorms with local residences.
- Off-campus, low rent apartments comprise half of the housing stock.
- Over three-quarters of the households are renter occupied, with one in ten remaining vacant.
- One-third of homes are single family; mostly occupied by local residents who own their homes.
- This market is bike and pedestrian friendly.

Socioeconomic Traits

- Their limited incomes result in thrifty purchases.
- They do not eat the healthiest foods, nor do they see a doctor regularly.
- They dress to impress with the latest fashions of the season.
- They prefer environmentally friendly products and vehicles that get good gas mileage.
- They're heavily influenced by celebrity endorsements and trends in magazines.
- They feel anything that can be done online is easier than in person.
- They have liberal political views.

Market Profile

- Own a laptop and a portable MP3 player.
- Watch movies and TV programs online; MTV and Comedy Central on TV.
- Use the Internet for social media connections, blogging, paying bills and downloading music.
- Have cell phones only (no landlines) and enjoy customizing them.
- Popular activities: backpacking, Pilates and Frisbee.
- Go out to the movies and out for drinks.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. About RPR (Realtors Property Resource)

- Realtors Property Resource® is a wholly owned subsidiary of the National Association REALTORS®.
- RPR offers comprehensive data – including a nationwide database of 164 million properties – as well as powerful analytics and dynamic reports exclusively for members of the NAR.
- RPR's focus is giving residential and commercial real estate practitioners, brokers, and MLS and Association staff the tools they need to serve their clients.
- This report has been provided to you by a member of the NAR.

About RPR's Data

RPR generates and compiles real estate and other data from a vast array of sources. The data contained in your report includes some or all of the following:

- **Listing data** from our partner MLSs and CIEs, and related calculations, like estimated value for a property or median sales price for a local market.
- **Public records data** including tax, assessment, and deed information. Foreclosure and distressed data from public records and RealtyTrac.
- **Market conditions and forecasts** based on listing and public records data.
- **Census and employment data** from the U.S. Census and the U.S. Bureau of Labor Statistics.
- **Demographics and trends data** from Esri. The data in commercial and economic reports includes Tapestry Segmentation, which classifies U.S. residential neighborhoods into unique market segments based on socioeconomic and demographic characteristics.
- **Business data** including consumer expenditures, commercial market potential, retail marketplace, SIC and NAICS business information, and banking potential data from Esri.
- **School data and reviews** from Niche.
- **Specialty data sets** such as walkability scores, traffic counts and flood zones.

Update Frequency

- Listings and public records data are updated on a continuous basis.
- Charts and statistics calculated from listing and public records data are refreshed monthly.
- Other data sets range from daily to annual updates.
