

Your school council needs you!

You know parental involvement improves student success.

That's why you joined PTA!

There is another way for parents to be involved at the school:

Join the School Community Council!

Your involvement on a council will determine how school funds are spent and will give you an opportunity to participate in decision-making at your school.

What can you do on the council?

- Establish credibility for parent involvement on the council by being an active, involved council member
- Participate in training
- Represent the parent point of view while providing information to the council and administration on all issues the council discusses
- Communicate and celebrate successes
- Provide support for new members
- Be well informed before taking a vote
- Encourage council to establish Rules of Order and Procedure
- Encourage other parents to become members, especially as your term is completed.
- Serve as a coordinator between the work of the council and the work of your PTA
